Synopsis:

A View from the Top

Most people know where they would like to end up in their careers, but few recognize the need to develop a plan on how to get there! Things don't always work out as planned, but not having a plan will most likely not get you there. Mr. Wadhwani will discuss and share with you how to develop a career map and then actually navigate your journey. He will do so by sharing his own experiences over the years in which he worked with various cultures/teams around the world. Dealing with new bosses, finding mentors and being a mentor is critical to career growth. The importance of building relationships and trust with clients and colleagues and expanding your network is another key aspect to achieving your objectives. As the world continues to get "smaller" and more competitive, we need to learn to manage and cope with change.
