### Synopsis:

### ***Managing Global Regulatory Changes Simply***

The end is not in sight for global regulatory changes in the post economy tsunami era. The emerging regulatory requirements are game changing; risk governance, market conduct, structural reform are reshaping banking industry's existing business strategy and operation model. The new era management vision is looking for holistic view of regulatory impact on business, operation, culture, technology and capital requirements. Improved clarity, transparency and tighten control of regulatory programs is certainly one of the Board of Director's top priority.
