

Mr Jonathan Giesecke
Senior Project Manager &
Engineering Track Manager,
Faithful+Gould

Jonathan Giesecke works at Faithful+Gould as the Track Manager for the Singapore Grand Prix, a role that he has undertaken since the inception of the event. He is a Civil Engineer with background in design, project and construction management, and is a specialist in the construction of temporary circuits including the Adelaide 500 events. Jonathan was also a speaker at the Professional Motorsports World Expo 2010 in Cologne, Germany.

Synopsis:

***Delivering a Complex and Time Critical Project –
Lessons Learnt from the Singapore Grand Prix***

Jonathan Giesecke, Senior Project Manager and Engineering Track Manager with Faithful+Gould, will share his experience in delivering the Marina Bay Circuit, along with the lessons learnt over the years. The Marina Bay circuits is constructed and dismantled in a very short amount of time with minimal disruption to traffic flows and the operation of businesses. The need to rapidly install and remove a significant amount of circuit infrastructure while minimising the impact to the public, and still achieving FIA endorsement, has driven the development of many circuit details.
